	greater than the amount paid.							
	Operational Risk - The Fund faces non-market risk, relating to purchasing,							
	holding and servicing the Fund's assets.							
	Credit Risk - Where the Fund invests in bonds, there is a risk the bond issuer may fail to meet its repayments. Changes in interest rates, inflation and the creditworthiness of the bond issuer may also affect the bond's market value. This risk is particularly relevant where the fund invests in bonds with a lower credit rating.							
	 Exchange Rate Risk - The Fund may invest in securities not denominated in GBP. The value of your investments may be affected by changes in currency exchange rates. Liquidity Risk - Certain Market conditions could make sufficiently liquid 							
	assets difficult to sell quickly at a fair price. This could result in an							
	unpredictable fall in the value, and overall liquidity of the Fund.							
					-			
	The above risks may cause losses in the Fund.
