

True Potential Cautious Portfolio

Portfolio Objective

The objective of the True Potential Cautious Portfolio is to provide investors with a way to achieve their investment goals. The Portfolio offers full exposure to different manager styles within the Cautious risk profile. We review the Portfolio monthly and, if necessary, rebalance to the allocation of styles that we believe offers the best opportunity for growth within the Cautious risk profile. The Portfolio aims to produce a higher risk-adjusted outcome at a lower average cost, compared to an equally-weighted model of Cautious funds.

Risk Profile: Cautious

The Cautious Investor may be sensitive to short-term losses. A Cautious Investor's potential aversion to losses could compel them to shift into a more stable investment if significant short-term losses occur. Analysing the risk-return choices available, a Cautious Investor is usually willing to accept somewhat lower returns in order to assure greater safety of his or her investment.

Ongoing Charge Figure (OCF)*: 0.78%

Investment Commentary

The True Potential Cautious Portfolio produced a return of -0.70% for the month of October, net of Portfolio OCF.

October proved to be a challenging month for asset market returns. Within fixed income, the resilience of the US economy and uncertainty around possible policy changes post-election led to a gradual repricing of US interest rate cuts. Against this backdrop, yields climbed higher and prices fell for US Treasuries. UK gilt pricing also suffered against a backdrop of elevated borrowing from the UK budget. Global equities in sterling terms finished higher on the month, however the US was the only region to produce a positive return. Sterling depreciated against the US Dollar which pushed up US equity returns in sterling. Chinese equities were lacklustre as optimism faded with stimulus levels not yet reaching investor expectations.

The True Potential Close Brothers Cautious fund outperformed the other funds within the Portfolio. Strong stock selection within US equities, and the fund's allocation to Gold, supported performance. The True Potential 7IM Cautious fund's allocation to government bonds and Japanese Yen were headwinds to returns.

Over October, no change was made to manager allocations within the Portfolio with the Investment team believing that positioning is optimal. Although no changes have been made to manager allocations, the True Potential manager cohort have been adjusting positioning. Examples include additions to corporate bonds in favour of government bonds, and increasing exposure to US equities.
