

True Potential Goldman Sachs Balanced

Investment Manager

Sub-investment manager

Objective and Investment Policy

The Fund aims to deliver growth to investors while at the same time managing portfolio risks.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 3 years.

The Investment Manager aims to achieve its objectives by investing in other funds, which may include those managed by Goldman Sachs, and other external fund managers.

The Fund will mainly invest in permitted other investment funds which themselves gain exposure to:

- Shares (unit of ownership in a company)
- Bonds (issued by governments and other organisations)
- Cash, deposits and money market instruments (investments usually issued by banks or governments that are a short-term loan to the issuer by the buyer)
- Currencies
- Commodities (indirectly through derivatives)

Where permitted the Fund may invest directly or through the use of derivatives in the asset classes shown above.

The collectives invested in may be collective investment schemes managed by the sub-investment manager or an associate of the sub-investment manager.

The Fund may use derivatives (a financial instrument whose price is dependent upon or derived from one or more underlying assets) for Efficient Portfolio Management (EPM), i.e. to protect against market or currency movements, to reduce costs, or to earn income or capital. The Fund may also use derivatives for investment purposes.

You can buy and sell shares on any working day in London, excluding UK public and bank holidays.

The Benchmark for this fund is Morningstar UK Moderate Target Allocation, this is a Comparator Benchmark. The benchmark may be used as a guide to compare and assess the performance of the Fund. Our aim is to help you monitor how your investment is performing. The Manager believes this is an appropriate comparator benchmark, given the multi-asset nature and relative risk profile of the Fund. The Fund does not use the benchmark as a target, nor is the Fund constrained by it. The mix of assets in the Fund may vary from those of the benchmark (and its constituents). Accordingly, it should be used for reference purposes only.

This fund may invest principally in collectives. Further information can be found in the True Potential OEIC 1 Prospectus available at www.truepotential.co.uk/documents/

Ongoing Charges Figure (OCF)*: 0.92%

There are no entry or exit charges.

Launch Date: 14 December 2017

Risk Profile: Balanced

The Balanced Investor may be somewhat concerned with short-term losses and may shift to a more stable option in the event of significant losses. The balance of investment risk and return are typically of equal importance to the Balanced Investor.

Why True Potential Goldman Sachs Balanced?

The True Potential Goldman Sachs Balanced Fund is sub-managed by Goldman Sachs Asset Management.

Goldman Sachs Asset Management operates a dynamic asset allocation to capture opportunities and navigate the economic cycle with a view to generating long term capital growth while managing portfolio risk. The portfolio looks beyond bonds and uses a range of alternative strategies.
