

True Potential Waverton Income

Investment Manager

Sub-investment manager

Objective and Investment Policy

The Fund seeks to deliver income between 2% and 4% annually with potential for growth over a rolling 3 year period net of fees.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 3 years.

The Fund will provide exposure to a diversified portfolio – using a multi-asset income strategy, combining different asset classes such as: shares, bonds, cash and alternative investments in real assets (investments in physical assets such as real estate, commodities, and infrastructure) and structured products (securities linked to the performance of other assets).

The Fund will typically (i.e. within normal market conditions) be invested:

- 20% - 75% in listed shares (the exposure within normal market conditions is expected to be around 60%);
- 10% - 50% in publicly traded corporate and/or government bonds (a loan, usually to a company or government, that pays interest) (the exposure within normal market conditions is expected to be around 28%);
- 0% - 30% in structured products and/or notes linked to credit, commodity or equity markets (the exposure within normal market conditions is expected to be around 6%); and
- 0% - 20% in money market instruments (investments usually issued by banks or governments that are a short-term loan to the issuer by the buyer), deposits and/or cash and near cash instruments (the exposure within normal market conditions is expected to be around 6%).

The above exposures may be achieved directly or indirectly, including through securities which are closed-ended funds and/or collective investment schemes. This may include schemes managed by the ACD, Investment Manager or sub-investment manager, or an affiliate of these parties. Corporate bonds may include high yield debt (which have a higher risk of default but potentially offer higher returns to compensate). Government bonds may include emerging markets (bonds issued by less developed countries).

Derivatives may be used for investment purposes to a limited extent for; a) investment purposes, b) protecting against the effects of interest rate changes, c) to enhance income returns, d) to protect against default risks, e) to limit currency exposure.

You can buy and sell shares on any working day in London, excluding UK public and bank holidays.

There are no geographic restrictions on the investments.

The Benchmark for this fund is Morningstar UK Moderate Target Allocation, this is a Comparator Benchmark. The benchmark may be used as a guide to compare and assess the performance of the Fund. Our aim is to help you monitor how your investment is performing. The ACD believes this is an appropriate comparator benchmark, given the multi-asset nature and relative risk profile of the Fund. The Fund does not use the benchmark as a target, nor is the Fund constrained by it. The mix of assets in the Fund may vary from those of the benchmark (and its constituents). Accordingly, it should be used for reference purposes only.

This fund may invest principally in collectives. Further information can be found in the True Potential OEIC 2 Prospectus available at www.truepotential.co.uk/documents/

Ongoing Charges Figure (OCF)*: 0.95%

There are no entry or exit charges.

Launch Date: 16 February 2022

Risk Profile: Cautious

The Cautious Investor may be sensitive to short-term losses. A Cautious Investor's potential aversion to losses could compel them to shift into a more stable investment if significant short-term losses occur. A Cautious Investor is usually willing to accept somewhat lower returns in order to lower their exposure to risk.

Why True Potential Waverton Income?

The True Potential Waverton Income fund is sub-managed by Waverton Investment Management.

The True Potential Waverton Income Fund provides a diversified fund designed to generate a regular income stream with prospects of capital growth.

Important Information

Under the current Packaged Retail Insurance and Investment Products (PRIIPS) guidance we consider all ongoing charges including those from closed ended vehicles such as investment trusts in the OCF (Ongoing Charges Figure) calculation. We use investment trusts to gain access to certain asset classes, such as infrastructure, their closed ended structure being an important feature in such asset classes. The return an investor earns from investing in an investment trust is determined by the performance of its share price. This is a disclosure change and the cost of investing in the fund does not change.

A Fund Prospectus and Key Investor Information Document (KIID) are available from www.truepotential.co.uk/fund-administration/#fund-documents or by email to investmentmanagement@tpllp.com.

From 6th November 2023, the Depository has changed from HSBC Bank PLC to Northern Trust Investor Services Limited.
