

# True Potential Balanced Income Portfolio

## Portfolio Objective

The objective of the True Potential Balanced Income Portfolio is to provide investors with a way to draw a secure, regular and growing income. The Portfolio offers exposure to a select group of investment partners and a range of risk profiles (Cautious to Growth), whilst remaining within the Balanced risk profile. We review the Portfolio monthly and, if necessary, rebalance to the allocation of styles we believe offers the best potential for yield within the Balanced risk profile. The Portfolio aims to produce a higher than average yield, compared to an equally-weighted model of True Potential Wealth Strategy income funds.

## Risk Profile: Balanced

The Balanced Investor may be somewhat concerned with short-term losses and may shift to a more stable option in the event of significant losses. The safeties of investment and return are typically of equal importance to the Balanced Investor.

**Ongoing Charge Figure (OCF)\*:** 0.81%

**There are no entry or exit charges.**

**Launch Date:** 1st October 2015

**Yield as of: 31 July 2024\*\*** 3.62%

Strategy and Asset Allocation are subject to change at any time without notice, are for information purposes only and should not be construed as investment recommendations.

Please refer to the Fund Prospectus and Key Investor Information Document (KIID) for more information.

\*OCF payable can fluctuate over time as the underlying investments are variable and can change.

\*\*Income subject to revision in the current market environment.

Yield figure indicated on this page is the forward looking 12-month yield, net of charges and UK withholding tax.

Personal dividend tax charges may still apply and is subject to individual circumstances.

Tax rules may change in the future.

\*Under the current Packaged Retail Insurance and Investment Products (PRIIPS) guidance we consider all ongoing charges including those from closed ended vehicles such as investment trusts in the OCF (Ongoing Charges Figure) calculation. We use investment trusts to gain access to certain asset classes, such as infrastructure, their closed ended structure being an important feature in such asset classes. The return an investor earns from investing in an investment trust is determined by the performance of its share price. This is a disclosure change and the cost of investing in the fund does not change.

## Investment Commentary

The True Potential Balanced Income Portfolio produced a return of +2.24% for the month of July, net of Portfolio OCF.

Fixed income outperformed equity markets, with longer dated sovereign bonds particularly strong. Within equities, there was a reversal of leadership compared to earlier in the year. US equities, particularly within the information technology and communication services sectors, relatively underperformed. Investors instead looked toward regions and sectors with cheaper valuation levels after the strong returns that have stretched valuation levels in certain sectors and in particular anything artificial intelligence related. Domestic UK equities fared particularly well in this environment, with Japanese equities also producing good returns in GBP terms.

The True Potential Close Brothers Cautious Income fund provided the strongest returns against this backdrop, with the fund's allocation to UK real assets, including infrastructure and real estate, contributing positively. The allocation to Gold was also beneficial over the month.

Over the month, no changes were made to manager allocations within the Portfolios with the investment team believing positioning was optimal. Although no changes have been made to manager allocations, the True Potential manager cohort have been adjusting positioning. Examples include additions to US and European equities on a stock specific basis, as well as reductions to UK corporate bonds.
