

True Potential Schroders Cautious Income

Investment Manager

Sub-investment manager

Schroders

Objective and Investment Policy

The Fund aims to deliver long term (five years plus) total return in excess of inflation (UK Consumer Price Index).

There is no guarantee that the Fund will achieve a positive return over the above, or any other period and investors should be aware that their capital is at risk.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is actively managed, which means that the manager chooses the mix of the portfolio, and the Fund is not tracking the benchmark nor is the Fund constrained by the value, price or components of that benchmark or any other aspect. The benchmark is a minimum target for the Fund, where the target return of the Fund aims to match or exceed the return of that benchmark.

The Fund will invest predominantly (at least 80%) in other investment funds.

The Fund may also invest in: Closed-ended funds, shares, exchange traded funds, bonds (issued by governments and other organisations), exchange traded commodities, deposits, cash and money market instruments (investments usually issued by banks or governments that are a short-term loan to the issuer by the buyer).

The Fund may hold up to 100% of its assets in other investment funds.

The Fund will have exposure to both United Kingdom and overseas markets.

The Fund may use derivatives (a financial instrument whose price is dependent upon or derived from one or more underlying assets) for Efficient Portfolio Management (EPM), i.e. to protect against market or currency movements, to reduce costs, or to earn income or capital. The Fund may only use derivatives and forward transactions for investment purposes on the giving of 60 days' notice to shareholders. The Fund does not currently use derivatives and forward transactions for investment purposes.

You can buy and sell shares on any day classed as a business day in London.

The Benchmark for the Fund is the UK Consumer Price Index (CPI). This is a target benchmark. UK CPI is a good measure of inflation and is the target set for the Fund's performance to exceed over a rolling 5 year period. The ACD has selected this target benchmark as the ACD believes it best reflects the target of returns above inflation over a rolling 5 year period.

This fund may invest principally in collectives. Further information can be found in the True Potential OEIC 2 Prospectus available at www.truepotential.co.uk/documents/

Ongoing Charges Figure (OCF)*: 1.00%

There are no entry or exit charges.

Launch Date: 24 June 2015

Risk Profile: Cautious

The Cautious Investor may be sensitive to short-term losses. A Cautious Investor's potential aversion to losses could compel them to shift into a more stable investment if significant short-term losses occur. A Cautious Investor is usually willing to accept somewhat lower returns in order to lower their exposure to risk.

Why True Potential Schroders Cautious Income?

The True Potential Schroders Cautious Income Fund is sub-managed by Schroders Investment Management Limited and is managed in line with the Schroder MM Diversity Income Fund.

The True Potential Schroders Cautious Income Fund provides a diversified fund designed to deliver long-term total return in excess of inflation from exposure, directly or indirectly, to a diversified portfolio of investments while also providing an income distribution.
