

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

True Potential Schroders Cautious Income A Accumulation Shares ISIN: GB00BWDBHP77 A Income Shares ISIN: GB00BWDBHN53

The Fund is a Sub-Fund of True Potential OEIC 2.

The Authorised Corporate Director of the Fund is True Potential Administration LLP, part of the True Potential LLP group.

Objectives and Investment policy

The investment objective of the Fund aims to deliver a **total return in excess of inflation** (UK Consumer Price Index) **while aiming to provide an income of 3-5% per year** on average, over rolling 5-year periods (net of fees).

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is actively managed, which means that the manager chooses the mix of the portfolio, and the Fund is not tracking the benchmark nor is the Fund constrained by the value, price or components of that benchmark or any other aspect. The benchmark is a minimum target for the Fund, where the target return of the Fund aims to match or exceed the return of that benchmark.

The Fund seeks to achieve its objective through the active management of a multi-asset strategy, by investing at least 80% of its net asset value in other collective investment schemes, including exchange-traded funds. It is expected that these collective investment schemes may gain exposure to equity securities (i.e. shares), fixed income securities (i.e. bonds issued by corporates and governments) and money market instruments (i.e. debt securities with short term maturities). The collective investment schemes may be managed by the sub-investment manager or an associate of the sub-investment manager. The Fund may also have some limited exposure to alternative asset classes, such as property, private equity and commodities.

The Fund may invest up to 20% of its net asset value directly in closed-ended funds such as investment trusts, exchange traded commodities, money market instruments, deposits, cash and cash equivalents (including deposits, treasury bills, certificates of deposit, bankers' acceptances and commercial paper).

The Fund may use derivatives (a financial instrument whose price is dependent upon or derived from one or more underlying assets) for Efficient Portfolio Management (EPM), i.e. to protect against market or currency movements, to reduce costs, or to earn income or capital.

Except as outlined above, there are no geographic, industry or sectoral restrictions on the investments of the Fund.

Income Shares: Any income the Fund generates will be paid out to you.
Accumulation Shares: Any income the Fund generates will be reinvested.

You can buy and sell shares on any day classed as a business day in London.

For full investment objectives and policy details please refer to the [Prospectus](#).

Please be aware that the Sub-Fund's capital is at risk and there is no guarantee that the Sub-Fund will achieve its investment objective over any particular period or at all.

Risk and Reward profile

The Risk and Reward Indicator demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards
Lower risk

Typically higher rewards
Higher risk

The Fund is in a **medium category** because the price of its investments have risen or fallen to some extent. The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment.

The price of the Fund and any income from it can go down as well as up and is not guaranteed. Investors may not get back the amount invested. Past performance is not a guide to future performance.

Investment Fund Risk - This Fund invests into other investment funds, they may invest in different assets, economic sectors, or countries (including emerging markets) and therefore have different risk profiles not in line with those of this Fund.

Performance Risk - Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro-economic environment, certain investment types and styles may perform better than others and investment objectives may become more difficult to achieve.

Emerging Market Risk - Investments in emerging markets may involve greater risks due to political and economic instability, and underdeveloped markets and systems.

Counterparty Risk - There may be cases where the organisation from which we buy a derivative, or an asset, fails to meet its obligations. The Fund's cash deposits are also subject to counterparty risk.

Derivative Risk - The Fund is entitled to use derivatives. Derivatives may not achieve their intended purpose. Their prices may move up or down significantly over relatively short periods of time which may result in losses greater than the amount paid.

Operational Risk - The Fund faces non-market risk, relating to purchasing, holding and servicing the Fund's assets.

Credit Risk - Where the Fund invests in bonds, there is a risk the bond issuer may fail to meet its repayments. Changes in interest rates, inflation and the creditworthiness of the bond issuer may also affect the bond's market value. This risk is particularly relevant where the fund invests in bonds with a lower credit rating.

Exchange Rate Risk - The Fund may invest in securities not denominated in GBP. The value of your investments may be affected by changes in currency exchange rates.

Investment Trust Risk - Investment trusts and closed ended funds may borrow to purchase additional investments. This can increase returns when stock markets rise but will magnify losses when markets fall. The value of an investment trust or a closed-ended fund moves in line with stock market demand and its share price may be less than or more than the net value of the investments it holds.

Liquidity Risk - Certain Market conditions could make sufficiently liquid assets difficult to sell quickly at a fair price. This could result in an unpredictable fall in the value, and overall liquidity of the Fund.

The above risks may cause losses in the Fund.

For full details on risk factors for this Fund, please refer to the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry Charge: 0.00%
Exit Charge: 0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment.

Charges taken from the Fund over a year

Ongoing Charges 1.00%

Charges taken from the Fund under specific conditions

Performance Fee None

The ongoing charges figure is based on the last year's expenses and may vary from year to year.

It excludes:

- the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- any temporary fee reductions which may apply for short periods (up to six months).

The Fund's annual report for each financial year will include detail on the exact charges made.

The ongoing charges figure is calculated as at 31/01/2025.

Please note that charges are taken from the fund's capital account. This will increase the fund's distributable income, but also constrain capital growth.

For further information about charges, please refer to relevant sections in the fund's prospectus at www.truepotential.co.uk/fund-documents

Past Performance

	2020	2021	2022	2023	2024
